Architectural 15 Year Warranty

Aluminum Coil Anodizing warrants for a time period of 15 years from the date of purchase that the anodized aluminum shall be free from defects in materials and workmanship, and that under normal interior operating conditions (i.e. fully enclosed in a building), material will not delaminate, yellow, darken, peel, blister, crack, or develop any significant surface deterioration that may reduce source image reflectance due to exposure to fluorescent lamp radiation & heat up to 300 degrees Fahrenheit.

This warranty excludes any condition on the anodized aluminum resulting from fire, accident, abuse, negligence, objects striking the material, corrosive atmospheres, or high humidity.

Should the anodized aluminum exhibit a condition of deterioration in breach of this warranty, Aluminum Coil Anodizing's obligation will be to replace the material with an equivalent amount of material of equal quality (customer fabricating & installation costs excluded). Aluminum Coil Anodizing shall not be liable for any incidental or consequential damages for breach of warranty.

Aluminum Coil Anodizing makes no warranty that the anodized aluminum is merchantable or fit for any particular purpose nor any other warranty except as set forth herein.
